DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “the cover is detachably attached to the substrate” and “said cover includes an air through-hole” must be shown or the feature(s) canceled from the claim(s). Figure 3a only shows that the cover is detachably attached to the multi-layer film and an air through hole between the surface of the mask and the cover. No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specification fails to provide claimed subject matter of "the cover is detachably attached to the substrate" and "said cover includes an air through-hole".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chiba.(US 5422921) in view of Kubota (JP63072119A).

Regarding claim 14, Chiba teaches a reflection type mask comprising:

a substrate (111) on which a multi-layered film (112,113) for reflecting X-rays is provided and

a mask pattern (116) which is formed on said multi-layered film for absorbing the X-rays.

However Chiba fails to teach a cover for protecting said mask pattern, wherein said cover is detachably attached to a substrate.

Kubota teaches a detachable cover for protecting a mask pattern.

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the reflective mask of Chiba with the detachable cover as taught by Kubota, since the cover of Kubota would prevent any damage to the pattern mask while in its use.

Regarding claim 15, Chiba teaches an alignment mark (117) formed on said multi-layered film (112,113).

Regarding claim 16, Chiba as modified by Kubota would teaches an alignment mark (117), wherein said cover protects said alignment mark by same motivation provided above.

Regarding claim 17, Chiba teaches said alignment mark (117) is formed on said multi-layered film.

Regarding claim 18, Kubota teaches that said cover with mask includes an air through-hole (figure 1).

Regarding claim 19, Kubota teaches said air through-hole is formed on a side surface of said cover.
